❖ STEEL CEILINGS ❖

The ease with which our ceilings are erected, the perfect fit of all plates, moulds, miters, etc., makes it possible for any mechanic with but ordinary ability to erect them satisfactorily and rapidly.

We use the best of material throughout in the manufacture of our ceilings, and the designs we carry, for rich, neat effects, are without a superior in the market. Let us send catalogue and quote prices. WE pay freight to any point.

LAFARGE CEMENT

OVER 25 YEARS ON THE MARKET

The only Cement that does not stain
LIMESTONE, MARBLE, GRANITE AND
TERRA COTTA

Used on nearly all the finest buildings in the
United States and Canada

Stucco Construction

By the use of Lafarge, a light, even color is obtained, free from brown and dirty stains, and from efflorescence, which mar the beauty of this work. Numbers of houses stuccoed with Lafarge have given finest results : : : :

LAFARGE IS A CHEMICALLY PURE CEMENT, VERY
FINELY GROUND AND OF LIGHT, EVEN COLOR : :

PRODUCTS OF THE SMOOTH-ON MFG. CO.**Smooth-On Castings**

SMOOTH-ON CASTINGS, in *Yellow Labeled Cans*, is an Iron Cement for repairing blemishes, blow-holes or defects in iron or steel castings. For foundrymen.

Smooth-On Compound No. 1

SMOOTH-ON COMPOUND No. 1, in *Blue Labeled Cans*, is an Iron Cement for repairing leaks or breaks in castings, boilers, etc. Withstands fire, water, steam or oil. Applied to cold metal.

Smooth-On Elastic Cement

SMOOTH-ON ELASTIC CEMENT, in *Gray Labeled Cans*, a Hydraulic Iron Cement that stops leaks and corrosion. Unequaled for seams of boilers or tanks where caulking is difficult; for boiler patching, screw-thread joints, flanged joints, etc. Applied with a brush or trowel to hot or cold metal.

Smooth-On Joints

SMOOTH-ON JOINTS, in *Red Labeled Cans*, is a Metallic Cement for connecting bell-and-spigot cast iron pipe in place of caulking lead and in combination with lead.

Smooth-On Cement Packing

SMOOTH-ON CEMENT PACKING, A combination of Smooth-On, Iron Cement and Rubber. Unequaled for withstanding high temperatures and pressures, and is ALIVE when in contact with steam or water or air.

Smooth-On Corrugated Iron Gaskets

SMOOTH-ON CORRUGATED IRON GASKETS. The gasket is coated on both sides with Smooth-On Iron Elastic Cement. It makes the cheapest and best flanged joint for any pressure or temperature. It makes a perfect iron joint.

Don't throw away Castings

Every time you do so you throw away profits—you make a certain percentage of the labor and equipment of your foundry count for nothing. You throw away your castings because they contain blow holes, cracks, uneven surfaces, etc.—and you don't think such work is up to your standard. All right! Just use

SHELTON METALLIC FILLER

and all defects will be remedied so perfectly that you or any one else will never know the casting had a flaw. Hurry now—send for a free sample and stop throwing away castings from the moment it arrives.

THE CANTON SANITARY DRYER

MADE IN ANY SIZE AND STYLE DESIRED AND
HEATED BY STOVE, GAS AND STEAM.

The Canton System of Heating and Ventilating is absolutely perfect. The cold air, steam and moisture is taken from bottom of cabinet, through stove, then up smoke pipe and out chimney. Other cabinets are ventilated into smoke pipe direct—the results being unsatisfactory and unsanitary drying of clothes. Send for Catalogue

THE CANTON CLOTHES DRYER AND MFG. CO

CANTON, OHIO.

YOU MAKE NO MISTAKE
IN BUYING THE

"O. V. C." CLOTHES LINE BRACKET

(Patent applied for)

The "O. V. C." Bracket swung to the interior of kitchen and the line is being pushed out in order to attach another piece of washing.

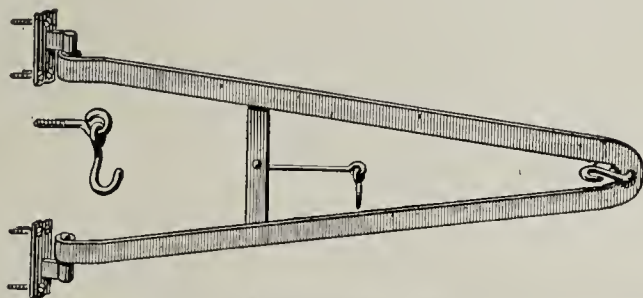

WHAT IT WILL DO.

Will carry a line (which works on a pulley) to and from the inside of window thereby rendering it possible to hang any amount of washed pieces for drying without the necessity of leaving the house or leaning out of windows, and this work can be done while sitting.

BECAUSE—Correct in Design, Saves Lives, Doctors' Bills, Time and Money; made of galvanized steel, weather-proof.

Your dealer has (or can get) the "O. V. C." Bracket. If he won't, we will express you one prepaid, together with full instructions as to its use, on receipt of **Price, \$2.00.**

For centuries the wash day has been looked forward to as one of hard labor. Now it is all overcome. With the use of the "O. V. C." Bracket a woman can hang as many clothes on a line as it will hold, and without the necessity of trotting into the yard every time a washing is to be hung, or leaning out of the window, being in peril of falling out.

(Patent applied for)

(Patent applied for)

The "O. V. C." Bracket adjusted and hanging on the outside with a full line of clothes, being dried.

WHAT IT SAVES.

TIME—Because the woman does not leave the house in order to attach the washed pieces to line.

DOCTORS' BILLS—Because she does not lean out of the window any more during the wash day, therefore no possibility of catching cold.

TROUBLE—It is a regular Peacemaker, and any woman who does the washing will appreciate an "O. V. C." Bracket, because it eliminates unnecessary responsibilities from her daily routine.

AIR COMPRESSORS

Nearly a million horse-power built and sold to date — Straight line and duplex types—Steam and power driven—Single, two, three and four stages—Pressures from 15 to 3000 lbs.—Capacities 8 to 9000 cu. ft. per min.—Built and sold under a guarantee of interchangeability of parts and superior materials. Catalogs 36 and R37.

COAL CUTTERS

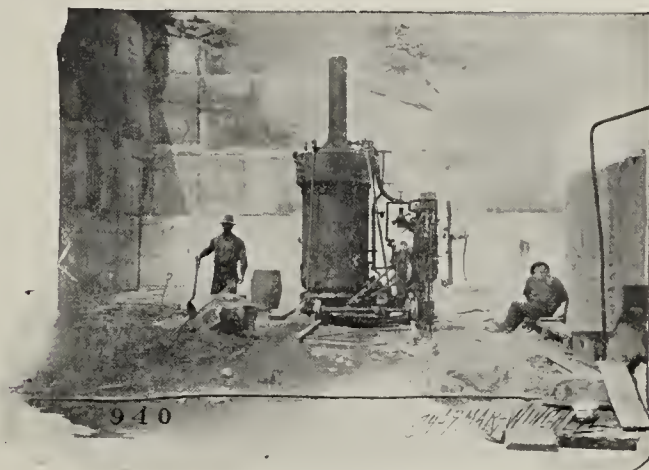

The "NEW INGERSOLL" Puncher, with a greater cutting capacity, lower repair cost and higher sustained economy than any other pick machine.—Catalog 52.

The "RADIALAXE" for shearing and undermining on any pitch, securing the advantages of blasting on "open end."—Catalog 353.

CHANNELERS

Marked by high economy, correct design, great endurance and an unequalled cutting capacity—Adapted to all rocks—"Monitor" Heavy Track Channelers—"Ram" Marble Channelers—"Broncho" Bar Channelers—Undercutting Channelers—

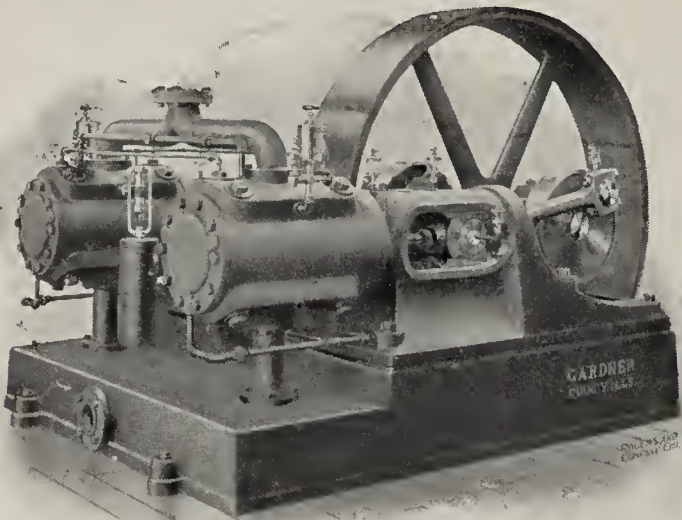

"Electric - Air" Track Channelers—Catalog 60.

ASK FOR INFORMATION.

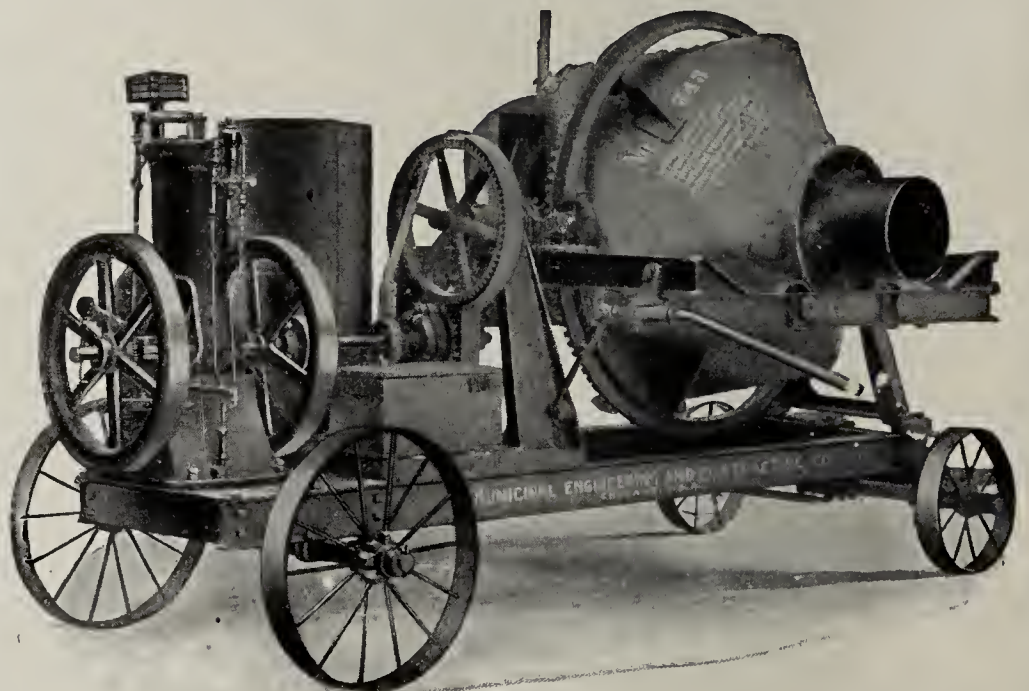

TILTING vs. NON-TILTING MIXERS

TILTING Machines are **pivoted** in a frame, and being **perfectly balanced** are **dumped instantly** at will of operator. Pivoting is **absolutely** the **simplest** form of **mechanism**. In **non-tilting** mixers the materials are **bailed up** in **small receptacles** and deposited on a discharge spout, which means **greater complication**, **multiplicity** of parts, **greater wear** and much **slower speed**. **Conclusion**:—Which is **simpler**, **quicker** and **more effective**, to drain a pail of water by upsetting, or by bailing it out with a small cup?

The Chicago Improved Cube Concrete Mixer

Has no **paddles** or **small receptacles** inside of **drum**, therefore does not clog. The **Cube** with **breaker rods** insures a mixture that is **absolutely uniform**. Produces in continuous operation **60 batches per hour**, and has frequent **records** of **two batches per minute**.

REINFORCING MATERIALS FOR LONG OR SHORT SPANS

The International F. & Fireproofing Company
BITTEL AVENUE, COLUMBUS, OHIO

Invented by a Contractor and Still Used by the Inventor

How often have you heard a contractor exclaim: "I wish the man who invented this machine had to use it himself for a while; then he might learn how to make it what it should be." It is an unfortunate fact that few tools or mechanical devices are used by their inventors. An inventor, as a rule, finds little satisfaction in working at anything but invention. He sucks the honey of pleasure from each new flower of his fancy, and flits away to another. But there are a few inventors who have been cast in a different mold. They invent

things for their own use, and, thereafter they use their own inventions in their daily work. The Ransome concrete mixer was invented by a contractor and is still used by him in his construction work. It is indeed, hard to say whether the name Ransome is better known because of the number of reinforced concrete structures built by the firm of Ransome & Smith, or because of the thousands of concrete mixers bearing the name plate of the Ransome Concrete Machinery Co. At any rate, the Ransome mixer has been made the simplest, strongest and

TO LOAD RANSOME CONCRETE CART.

most rapid mixer of perfect concrete; and there are few contractors who will not attribute the result to the fact that the Ransome mixer was invented a generation ago by a contractor and is still used by the inventor.

Send for Ransome's Handbook of Concrete Machinery.

CHICAGO CONCRETE MIXER EFFICIENT SIMPLE DURABLE

Why dump the Mixed Concrete on the ground and then shovel into wheelbarrows, when you can dump direct into barrows with the **Chicago Mixer**? It is the only Batch Mixer that can dump into wheelbarrows successfully, saving time and expense. Your wheelmen take their load themselves. It does not require an extra man to dump the Mixer. The **Chicago Concrete Mixer** is lower on the charging side than other Mixers. It is also lighter. **ALL SIZES AND MOUNTINGS.** Send for our catalogue which explains why it is the best all round Mixer on the market.

AMERICAN WIRE ROPE.

☐ Hoisting rope of every description for elevators, mines, coal hoists, ore hoists, conveyors, derricks, ballast unloaders, etc. Towing hawsers, mooring lines, tiller rope and ships' rigging. Power transmission rope, street railway, mine haulage and surface haulage cables. Dredge and logging ropes, suspension bridge cables, cableway ropes and strands, guy strands, sash cord and clothes lines. Flat rope for hoisting purposes.

☐ Special rope of any description made to order.

☐ All the foregoing styles of rope are made of Swedish iron, crucible cast steel, plow steel, or galvanized iron or steel, according to requirements.

☐ Fittings and appliances for use in connection with wire rope.

☐ Large stock of all sizes carried in convenient warehouses, ready to ship immediately on telegraphic order, and in lengths from a foot to a thousand feet.

NOTE CONTINUOUS BOND

ROOFS

THE CLINTON FIREPROOFING SYSTEM

- ¶ We base our claims to superiority of the CLINTON FIREPROOFING SYSTEM—THE SYSTEM WITH THE CONTINUOUS BOND—over other systems on the fact that CLINTON WELDED WIRE, which forms the integral part of the system, establishes a continuous bond in the concrete and creates an actually monolithic construction.
- ¶ CLINTON WELDED WIRE, made from 6 to 10 gauge drawn steel wire, galvanized or plain, can be laid in lengths up to 300 feet, thereby forming a continuous bond for that distance. In a building 200 feet long, for instance, our reinforcing is secured at the front or rear of the building and carried through the entire distance without a break. Heavier gauge wire will be laid in lengths up to 60 feet, and locked or hooked to the next sheet where building requires more than one sheet in length.
- ¶ The desirability of this method, as contrasted with a system where lapped ends of steel fabric are necessary every few feet, is readily appreciated. For this reason, no entire collapse of any arch erected with CLINTON WELDED WIRE can occur unless the weight imposed on the arch is sufficient to strain and break all of the wires.
- ¶ In using the CLINTON FIREPROOFING SYSTEM, there is absolutely no chance for accident, owing to the continuous bond established in the concrete. The reinforcing is equally strong at all points, and the reinforcing members are exactly spaced 2, 3 or 4 inches apart, as the case may be. This spacing is exact; it is established by machinery and is not subject to the carelessness of employees.
- ¶ The CLINTON FIREPROOFING SYSTEM has been used in some of the most important structures on this continent, embracing government, municipal, railroad, manufacturing, hotel, library, school, warehouse, theatre, residence and other buildings.
- ¶ The CLINTON FIREPROOFING Catalog, which is a handbook on reinforced concrete fireproof construction, with particular reference to the application of the CLINTON FIREPROOFING SYSTEM, will be mailed free on application to any of our offices.

The Anderson Patent Traveling Crane

IF YOU HAVEN'T ONE, BETTER PURCHASE AT ONCE

THE POWER TRAVELING CRANE

has become a recognized necessity in every stone-cutting plant.

EVERYBODY CAN AFFORD ONE

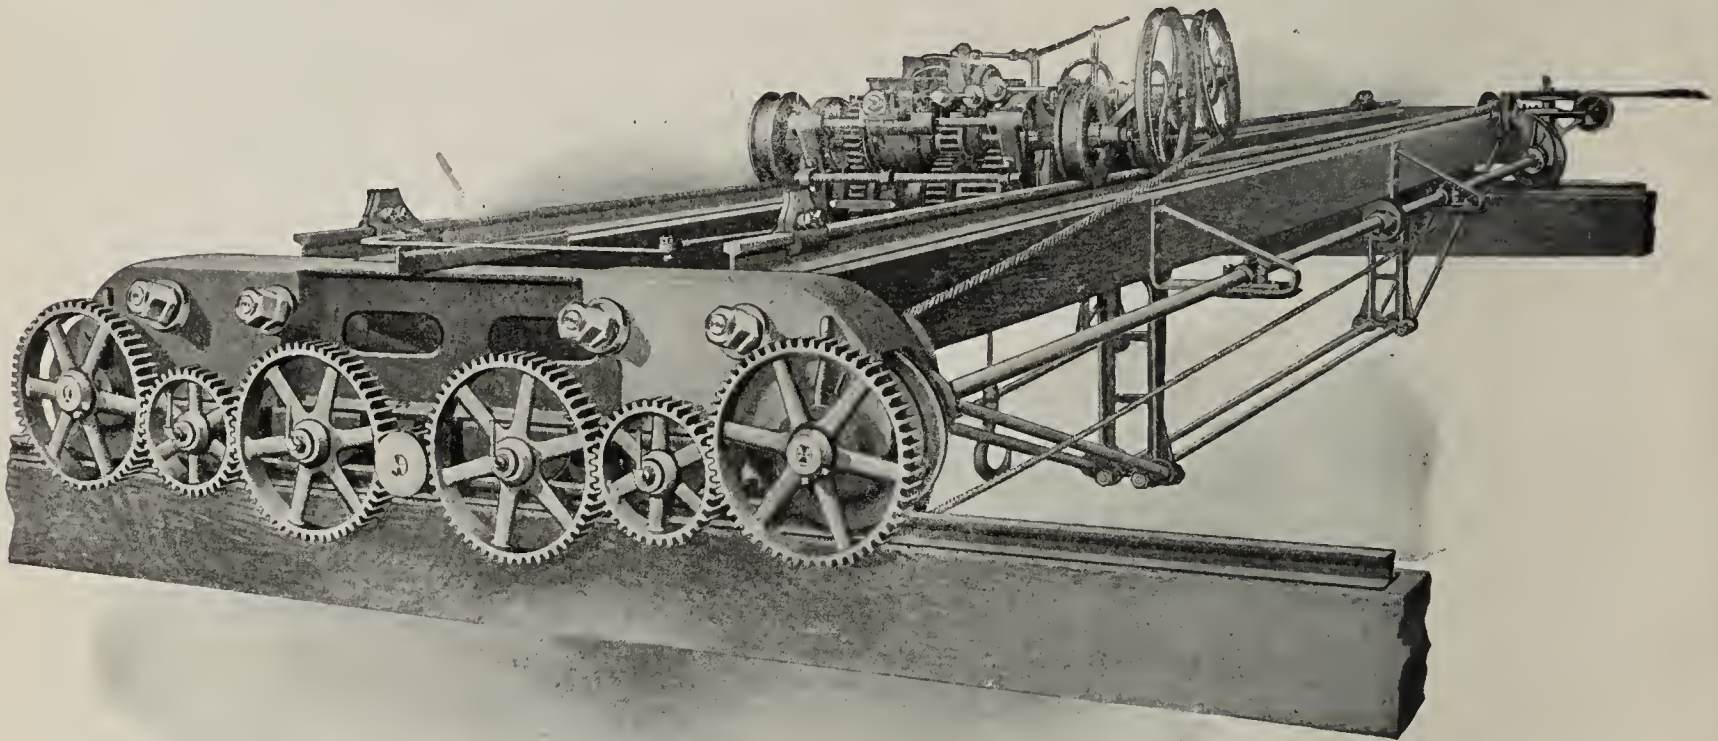

at the price we charge, so all may enjoy its many advantages.

THE PECULIAR METHOD OF ROPE

driving employed is patented and is a great saver of power.

A SIGNAL MAN ISN'T NEEDED

with our crane. Operator is over the work where he can best see to placing it.

It is a Time Saver. It Handles Stone Without Injury. It Facilitates Execution of Orders. It Brings the Expense Account DOWN and the Profits UP. 10, 20 and 40 Tons Capacity. Fully Described in Our Catalogue. We are Prepared to Furnish Plans for the Most Modern Stone Plants and the Complete Equipment.

We also build The Lane Patent Circular Saw Mills and a complete line of Wood-Working Machinery.

ROCK DRILLS

Over 87000 built and sold, and in operation all over the world, everywhere maintaining an unequaled record for speed, endurance and economy.

The **"Sergeant"**—an independent valve type with a uniformly high efficiency under all conditions—The best "all-around" drill for general mining and tunneling in hard rock with air or steam.—Catalog 45B.

The **"Rand Little Giant"**—a tappet valve type supreme in its class, unequaled as a steam drill and giving high economy with air.—Catalog 46.

THE TEMPLE-INGERSOLL

"ELECTRIC-AIR" DRILL

A new machine combining electrical economy and flexibility with air drill power, capacity and endurance—Solves the problem of rock drilling by electric power—Built in two sizes, equivalent to a $3\frac{1}{4}$ and $2\frac{1}{2}$ inch air drill, using respectively 5 H. P. and 3 H. P. at the drill—Simple, practical, powerful, absolutely unique.

—Catalog 20.

CALYX DIAMOND-LESS CORE DRILL

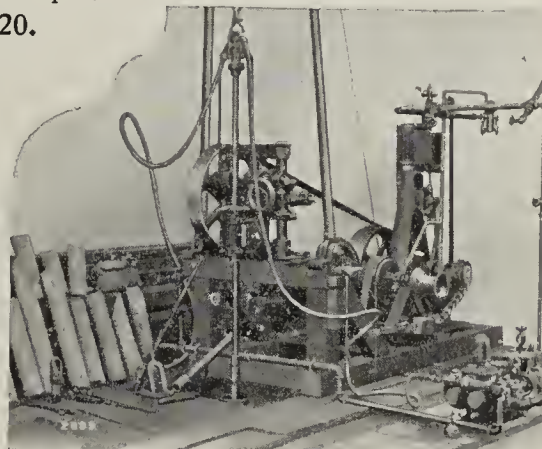

Does its work from 30 to 50 per cent. cheaper than any other core drill—Removes larger cores than any other drill, $1\frac{1}{8}$ to 15 inches diameter—Has never encountered a substance too hard for it to core at an economical rate—Has a depth capacity up to 6000 feet.—Catalog 91.

HAMMER DRILLS

Made in two types, each standard in its class—

The **"Little Jap"** valve tool and the **"Little Imp"** valveless—Hand or air feed mounting—For all purposes of light rock excavation in mine, quarry or contract.—Bulletins 2009 and 2011.

Why H. & W. Drills Do 200 to 400% More Work.

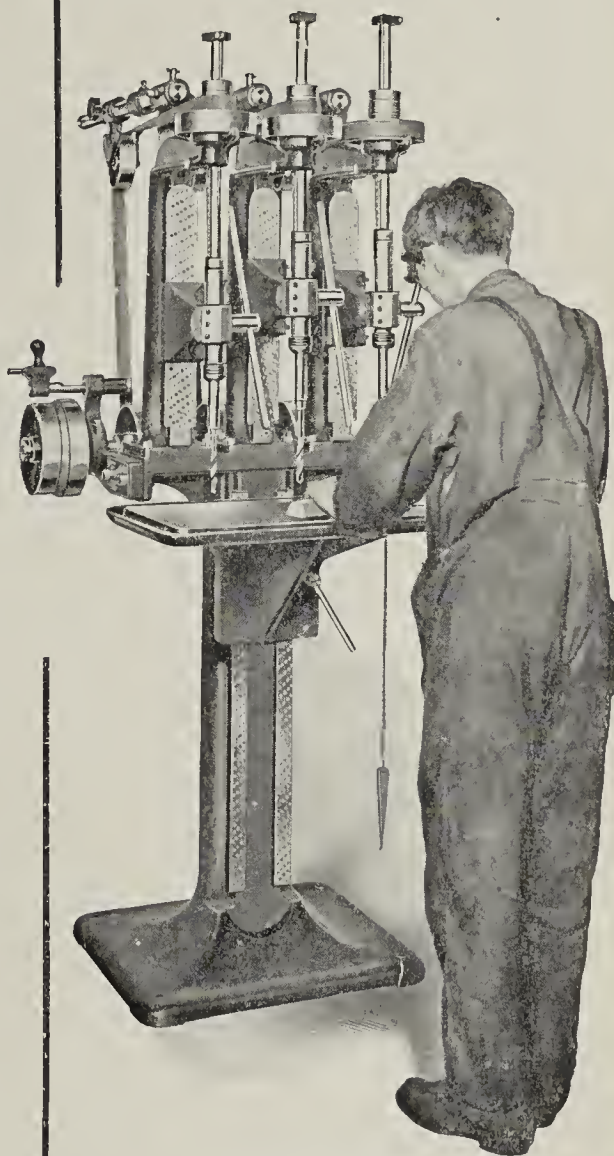

RICE PATENT

¶ If you take one step forward and two backward how soon will you reach your destination? That's the way most drills run. Most of the power never reaches the drill point. It is spilled on the way. That's why the H. & W. Ball Bearing Drill does 200 to 400% more work. It has one continuous cemented belt that takes every ounce of power to the drill point.

¶ It has four speeds and two steps on the spindle and driving pulleys.

¶ Get H. and W. Drills and take three steps forward.

RICE PATENT

STANDARD OF THE WORLD FOR MORE THAN FIFTY YEARS

FROM the simplest hoist by hand to the most comprehensive elevator equipment, embracing in one instance over 40 elevators in a single building, we are prepared to successfully cope with any elevator problem. Besides ordinary passenger and freight elevators, we manufacture and install dumb waiters, escalators (moving stairways), hoists for mines, docks, warehouses, building operations, blast furnaces, etc. We also build incline railways, gravity conveyors, etc.

The new Singer Building, Broadway and Liberty Street, New York, 42 stories high from the street level was made possible by OTIS ELEVATORS of the Traction Type, the latest development in the solution of modern extreme elevating problems.

CORRESPONDENCE INVITED.
